GOAL

Full Stack Engineer

PROFESSIONAL SUMMARY

Full Stack Developer with experience in React.js, TypeScript, Node.js, and Express.js, specializing in building high-performance, scalable, and maintainable web applications. Skilled in Next.js and Nest.js, microservices architecture, and optimizing MongoDB/MySQL databases for efficiency. Strong background in RESTful API development, state management (Redux, Context API), and CI/CD pipelines. Experienced in Docker and containerized deployments. Passionate about writing clean, well-structured, and efficient code, continuously learning modern web technologies, and contributing to innovative solutions in software development.

ACADEMIC TRAINING

Degree in Systems Analysis and Development - UNICESUMAR, completion in 2026

EXPERIENCES

Good Software Dev – Full Stack Engineer

December 2024 – Present | Remote (Dallas, Texas, USA)

- Developed and maintained full-stack applications using React.js, TypeScript, JavaScript, Node.js, and Docker.
- Built and optimized microservices and integrated RESTful APIs for seamless data flow.
- Designed and optimized MongoDB and MySQL databases for high performance.
- Utilized Redux and Context API for state management and frontend optimization.
- Conducted frontend and backend debugging, improving system reliability and efficiency.

Trybe - february/2024 until june/2024

Front-end developer and Front-end teacher

- Developed interactive, scalable web applications with React.js, TypeScript, and Next.js.
- Taught and mentored students in HTML5, CSS3, JavaScript, React.js, and API integrations.
- Conducted code reviews to maintain high standards and best practices in frontend development.

TECHNICAL SKILLS

Frontend Development: React.js, Redux, Next.js, Tailwind CSS, TypeScript, JavaScript (ES6/ES7), HTML5, CSS3.

Backend Development: Node.js, Express.js, Nest.js.

Databases: MongoDB, MySQL.

Microservices & APIs: RESTful APIs, API integration, GraphQL

DevOps & Tooling: Docker, CI/CD, Git, GitHub.

Testing & Quality: Jest, Mocha, React Testing Library, Unit Testing, End-to-End Testing.

Other Tools: Webpack, Babel, Agile (Scrum, Kanban), Command Line Interfaces, Git, GitHub, Docker, CI/CD.

LANGUAGES

- Portuguese - Fluent
- English - Fluent
- Spanish - Intermediary

COMPLEMENTARY TRAINING

- Full-Stack Development Training - Trybe (1230h)
- Machine Learning Training - ALURA
- Quality Assurance: testing plan and bug management - ALURA

ADDITIONAL INFORMATION

1. Proficient in clean coding principles, scalability, and performance optimization.
2. Experience in containerization with Docker and deploying microservices.
3. Strong understanding of version control, CI/CD, and automated testing.
4. Passionate about mentoring, open-source contributions, and technical leadership.
5. Active in the developer community, with explanations of different code snippets on my [YouTube](#) channel, and solving 70+ algorithm challenges on [Codewars](#).
